For 30 years now Submersible Systems has been manufacturing, assembling and selling life-saving breathing systems worldwide.

Now, SSI is making all those years of expertise available to you.

We are proud to announce SSI's new Manufactured Components Division – providing custom CNC manufactured parts and small aluminum cylinders to meet your needs.

At SSI We have capabilities of working with most material types specializing in Aluminum or plastic. We can also provide assembly capabilities to companies requiring high precision workmanship while meeting worldwide timely delivery. We presently have machining capabilities for turned parts from 1/16 inch (1.6mm) to 2 5/8 inches (65mm), and chucking capabilities to 8 inches (203.20mm) all with .0001 inch (.0003mm) of precision. Our equipment has 4 axis capabilities including off center and c axis options. Our equipment is also equipped with auto bar feeders and parts conveyor systems giving us the ability to run 24 hours a day 7 days a week.

Machines:

- Mori Seiki NL 2000SY Turning Center
- Tsugami SS32 Swiss Turning Center

Additional Processes:

- Sawing
- Milling
